General Hire Equipment

CONCRETE

Coates Hire gives you access to a wide range of concrete products to assist with your project. Our range is useful for mixing, pouring and finishing your concrete slab.

CONCRETE MIXER

- This concrete mixer is ideal for creating a concrete mix for those small to medium projects.

VIBRATING SHAFTS

- Portable vibrator shaft that is used for concrete pour works.
- The Flexdrive vibrator shaft is to be used in conjunction with a petrol (or diesel) drive unit.

POWER TROWELS

- Finishing concrete slabs as they dry to provide perfect results.

CONCRETE SURFACE PREPARATION

Effective surface preparation is crucial in a variety of work tasks, which is why Coates Hire offers a comprehensive range of tools and equipment to suit your needs.

CONCRETE MOWER

- A handheld concrete grinder with Diamond grinding plate, great for small areas and getting into corners, edges and tight spaces.

FLOOR GRINDER

- This small electric concrete floor grinder is ideal for prepping and cleaning concrete slag from floors.

AIR OPERATED SCABBLER

- Useful for concrete scarifying.

CONCRETE CUTTING AND DEMOLITION

Coates Hire offers a wide selection of concrete breaking and cutting tools to assist with breaking up concrete slabs and foundations, cutting asphalt, backfilling, tamping and digging into heavy clay.

PETROL DEMO SAW

- This high powered petrol cut off saw powerfully and easily cuts up to 150mm in depth. It can cut into materials including pre-fab concrete, natural stone, pipes and asphalt.

BATTERY DEMO SAW

- This battery powered cut off saw powerfully and easily cuts up to 100mm in depth. It can cut into materials including pre-fab concrete, natural stone, pipes and asphalt.

ROAD SAW

- Self-propelled, walk behind diamond bladed saw for cuts in concrete or asphalt to a depth of 162mm. Comes with a water bottle with quick connect to blade guard.

SMALL ELECTRIC BREAKER

- Small electric breaker for concrete demolition works.

LARGE ELECTRIC BREAKER

- Large electric breaker for concrete demolition works.

AIR OPERATED BREAKER

- Air operated breakers designed to break up concrete slabs and foundations. Available in small, medium and large sizes.

BREAKER TROLLEY

- A trolley for a 16kg electric breaker, assisting in carrying the weight of the breaker while keeping the operator in an upright position and minimising vibrations. For fast and easy removal of tiles and concrete demolition.

SILICA DUST MITIGATION

Coates Hire offers a range of dust mitigation solutions that minimise user exposure to hazardous silica dust when used in accordance with manufacturer's specifications.

DUST EXTRACTION KIT DRILLING

- For all drilling.
- Two Interchangeable drilling heads for optimum dust removal.
- Tough rubber seal allows for adhesion to most masonry surfaces.

DUST EXTRACTION KIT SMALL/MED BREAKING

- For small/medium breaking.
- Compatible with DEWALT plus most 1-1/8" electric pavement breakers.
- 3 different dust boots to match the boot length to the chisel to provide maximum dust extraction.

DUST EXTRACTION KIT LARGE BREAKING

- For large breaking.
- Compatible with DEWALT plus most 1-1/8" electric pavement breaker.

VACUUM DUST EXTRACTOR - SMALL

- M Classified to meet legislation.
- Innovative dual filter cleaning system maintains performance.
- Constant suction power even with the finest concrete and wood dust.

COMPACTION

Looking to hire rammers or a vibrating plate compactor? Coates Hire offers compaction equipment that is easy to transport in a ute or trailer, but strong enough to get the job done right.

RAMMER

- Upright compaction rammer is ideal for compaction of footings, trenches and small areas. Available in petrol and diesel.

SMALL VIBRATING PLATES

- Versatile vibrating plates which are ideal for compacting soil, sand or crushed rock. Available in petrol or diesel.

LARGE VIBRATING PLATES

- A high performance reversible plate compactor, for the consolidation of excavation back-fill, sub bases for roads, paths and car parks.

2.6T SMOOTH DRUM ROLLER

- Double drum smooth roller enables the user to achieve compaction on the front and rear of the machine and are suitable for compacting fine granular material and asphalt.

EARTHMOVING

Whether you're moving a mountain, filling a hole or just digging one, Coates Hire has a wide range of earthmoving equipment for any sized job. Our smaller earthmoving equipment is easily transportable on a trailer.

MINI LOADER

- Mini Loader is perfect for all terrains due to the independent 4-wheel hi –torque drive system, and coupled with the 23inch tyres allows this loader in the most undulating places with an amazing 185mm of ground clearance.

MINI SKID STEER

- Useful for landscaping and site earthmoving works.

MINI EXCAVATOR

- Versatile mini excavators are suitable for a wide range of excavation and earthmoving tasks across the work site. Units are supplied with a trailer.

ACCESS

No matter how tricky the spot, Coates Hire has just the thing to get you up there safely and easily. With Australia's largest range of access equipment, Coates Hire can put you within reach.

SMALL ELECTRIC SCISSOR

- Electric scissor lift used for working on flat concrete slabs.
- Available on a trailer.

TOWABLE BOOM

- Robust and reliable trailer mounted boom lift, which is ideal for tradespeople and facilities maintenance applications.

SITE POWER AND LIGHTING

Coates Hire's range of power and lighting equipment will keep your project running - day or night. So whatever the scale of the job or application, Coates Hire puts the power in your hands.

SMALL INVERTOR GENERATORS

- Portable silenced generator for temporary power solutions.

PETROL/DIESEL GENERATORS

- Portable generator for temporary power solutions. Available in petrol and diesel.

TOWABLE DIESEL GENERATORS

- Towable silenced diesel generator, ideal for supplying temporary power to a building site or event.

FLOOD LIGHTS

- The Arlec 2 x 45W Tripod LED Work light with Tripod provides a total of 7000 lumens, 5000K Daylight color temperature and a 100° bream angle. It features a convenient tilt and swivel head to give maximum light coverage.

DISTRIBUTION BOARDS

- To be used in conjunction with a silenced diesel generator to create multiple electrical outlets.

WATER BLASTERS

Our range of electric, petrol, diesel and combination water blasters are ideal for heavy duty cleaning. Our electric models are suitable for quiet operation, whilst our petrol models are recommended for strong cleaning and degreasing.

ELECTRIC

- Electric pressure cleaner suitable for cleaning in lighter duty industrial and commercial applications.

PETROL/DIESEL

- Available in petrol or diesel, this cold water pressure cleaner is ideal for those industrial, commercial or residential applications.

COMBO

- Combination pressure cleaner and floor cleaning unit. Suitable for cleaning driveways, paths and large areas.

WATER PUMPING

Water and work sites generally don't mix, which is why Coates Hire carries a large fleet of pumps to move water efficiently. Our range of submersible pumps are designed to pump mud and light slurry on building sites with minimal supervision.

ELECTRIC SUBMERSIBLE 25MM

- Water removal on sites where small puddles of water have been found.

ELECTRIC SUBMERSIBLE 50MM

- Water removal from basements and footings.

212 FLEXDRIVE 50MM

- Small submersible pump to be used in conjunction with a drive unit.

AIR EXTRACTION AND SITE CLEAN-UP

Cleaning can be a real hassle without the right tools for the job. That's why Coates Hire offers a range of air extraction and wet/dry vacuums to keep your project site spotless.

300MM EXTRACTION FAN

- These extraction fans provide powerful and effective ventilation for a wide range of applications.

600MM EXTRACTION FAN

- These large extraction fans come with a heavy pipe frame, heavy duty lifting hook and large diameter wheels for easy handling on site.

WET/DRY VACUUMS

- Industrial Vacuum for wet and dry applications.

TRUCKS AND TRAILERS

Coates Hire has a large fleet of trucks and trailers to help you get to and from the site. With flexible hire arrangements, you can hire a truck or trailer for a few hours or a few days. So whatever it is you need to get moving, Coates Hire can help.

2T TIPPER TRUCK

- With an all steel body and drop sides, our tippers are ideal for moving and unloading soil and aggregates. With a removable tailgate, you can easily manoeuvre your load into position. The tippers are highly productive and take just 20 seconds to raise/20 seconds to lower.

BOX AND CAGED TRAILERS

- Heavy duty boxed/caged trailers are stocked in various sizes and can be used for domestic, commercial or industrial purposes.

FURNITURE TRAILERS

- Ideal for furniture removal and relocation.

coateshire

While Coates Hire makes every effort to supply the equipment described and pictured in this brochure, all equipment offered is subject to availability. Should Coates Hire through whatever circumstances need to offer an alternative make or model, customers can be assured that this will be of the same quality as the item shown or displayed in this brochure. All information about equipment in this brochure is to the best of our knowledge correct, but we would urge customers to check all details at the time of hire or enquiry. Coates Hire reserves the right to change information without prior notice.

Connecting Trailers

Check:
- 50mm tow ball
- Vehicle towing capacity can support load being towed
- Level surface where possible
- Correctly Rated Bow Shackles are used

1 **Brake** the trailer (chocks, trailer brake)

2 **Wind** jockey wheel **UP** so tow coupler will clear vehicle tow ball

3 **Reverse** vehicle & align vehicle tow ball **below** tow coupler

4 SECURE vehicle (park gear, handbrake on)

5 Cross over **trailer chains, connect** to vehicle tow bar with **RATED BOW SHACKLES**

6 OPEN locking **latch** (if fitted) & **LIFT** coupler **handle** (if required)

7 LOWER **trailer** onto **tow ball** by winding down **jockey wheel**

8 **Engage** coupler handle, LOCK latch, & fit **safety pin**.... or green indicator on

9 Connect trailer **LIGHT PLUG** to vehicle

10 **Fully** WIND UP **jockey wheel**, **ROTATE** and **LOCK** into position

11 **Release** TRAILER BRAKE & **open** REVERSE LOCK-OUT latch (if fitted)

12 Check all **trailer lights** work

To **DISCONNECT** the trailer, complete above steps in REVERSE ORDER.
